

JULIA BERRY

Flower Mound, TX | berryjulial@yahoo.com

PROFESSIONAL PROFILE

- Computer Science educator, curriculum developer, College Board AP Computer Science A Reader, and former software engineering project leader with an M.S. in Software Systems Engineering (4.0 GPA), 6+ years of secondary Computer Science teaching, and nearly a decade of technology-industry experience.
- AP Computer Science experience spanning AP-aligned curriculum, assessment, exam preparation, and annual AP scoring; students have achieved 90–100% AP Computer Science A pass rates over five years with average scores above 4.0.
- Experienced in developing Computer Science curriculum, instructional materials, formative and summative assessments, and technology-enhanced learning experiences, with strong project planning, cross-functional collaboration, technical communication, and emerging-AI professional learning.

AP COMPUTER SCIENCE, ASSESSMENT & CURRICULUM EXPERIENCE

College Board AP Computer Science A Reader

2023 – Present

- Evaluate AP Computer Science A student responses using College Board scoring standards and participate in the annual AP scoring process.

Computer Science Teacher, Marcus High School

Aug 2020 – Present

- Teach the full Computer Science course sequence offered at Marcus High School, including Computer Science 1, 2, 3, and AP Computer Science A, emphasizing Java, Python, programming, problem-solving, and computational thinking.
- Develop and implement Computer Science curriculum, instructional materials, formative and summative assessments, and technology-enhanced learning activities.
- Prepare students for the AP Computer Science A Exam through AP-aligned curriculum, targeted assessment, feedback, and exam preparation; consistently achieved 90–100% pass rates over five years with average AP scores above 4.0.
- Use assessment evidence and student performance to identify misconceptions, refine instruction, and provide targeted support.
- Prepare students for the Certiport IT Specialist Python certification exam; 37 of 43 students (86%) earned industry certification in 2026.
- Develop partnerships with universities and technology organizations to connect students with Computer Science programs, technology careers, and industry learning opportunities.

COMPUTER SCIENCE LEADERSHIP & STUDENT ENGAGEMENT

UIL Computer Science Coach

2022 – Present

- Coach students in competitive programming and problem-solving; guided students to district, regional, and state-level success, including UIL State Championship advancement in 2025 and 2026 and a fourth-place individual finish in 2026.

Lockheed Martin Code Quest Coding Competition Coach

2022 – Present

- Led student teams to back-to-back first-place finishes in the Code Quest programming competition.

SOFTWARE ENGINEERING & PROJECT LEADERSHIP

Project Leader, Citicorp Credit Services, Hagerstown, MD

Apr 1996 – Mar 2002

- Led software development projects supporting Citibank Credit Card Operations; planned, organized, coordinated, tested, and implemented business applications.
- Managed schedules, priorities, resources, and implementation activities; coordinated software developers, systems analysts, testers, and business stakeholders.
- Analyzed business requirements and translated them into effective technical solutions.

Senior Programmer, Washington Gas, Washington, DC

Aug 1995 – Apr 1996

- Planned, coordinated, developed, and implemented the Customer Service application.

Graduate Research Assistant, George Mason University, Fairfax, VA

Sep 1993 – Sep 1995

- Created a combined object-oriented analysis and design method integrating strengths of leading object-oriented techniques.

CONTINUING PROFESSIONAL EDUCATION

- WeTeach_AI High School HUB (June 2026) – University of Texas at Austin and Texas Advanced Computing Center; 18 hours of professional learning in artificial intelligence, machine learning, and classroom integration of AI.
- Advanced Python (July 2026) – Carnegie Mellon Computer Science Academy; 35 hours of advanced Python professional development.
- Google Gemini for Education (June 2026) – University of Texas at Austin and Texas Advanced Computing Center; 8 hours of professional development in generative AI tools and instructional applications.
- Kagan Strategies (June 2022).
- WeTeach AP CSA (June 2020) – University of Texas at Austin and Texas Advanced Computing Center; 28 hours of AP Computer Science curriculum training.
- WeTeach_CS for High School Deep Dive (June 2020) – University of Texas at Austin and Texas Advanced Computing Center; 12 hours of CS1 curriculum training.

EDUCATION & CERTIFICATIONS

George Mason University, Fairfax, Virginia

Master of Science in Software Systems Engineering - GPA 4.0/4.0

National University of Engineering, Lima, Peru

Bachelor of Science in Systems Engineering

Region 10 Education Service Center

Texas Teacher Certification Program: Computer Science 8-12; Spanish EC-12; Math 7-12; Bilingual EC-4
